1. Executive Summary

Investment Opportunity at a Glance

Peacefull.ai is a clinician-supervised AI platform that provides 24/7 mental health monitoring, automated documentation, and real-time crisis detection. We bridge the critical gap between therapy sessions, helping clinicians detect concerning patterns 60x faster while saving 5.2 hours per week on documentation.

Founded: Q2 2026 | **Stage:** Seed | **Raising:** $10M

1.1 The Company

Peacefull.ai is transforming mental health care delivery through AI-augmented, clinician-supervised patient monitoring. Our platform provides continuous insight into patient wellbeing between therapy sessions, enabling early intervention and improved outcomes.

Unlike consumer mental health apps that operate without clinical oversight, our platform is designed from the ground up for healthcare environments, with HIPAA compliance, safety protocols, and seamless EHR integration.

1.2 The Problem

Mental health care is in crisis:

68%
of mental health crises occur between therapy sessions

30%
of concerning patterns go unnoticed by clinicians

4+ hrs
average response time to patient crises

$50B
annual cost of untreated mental health conditions in the US

Clinicians are burned out, patients fall through the cracks, and health systems struggle to provide continuous care. The status quo is unsustainable.

1.3 The Solution

Our AI-powered platform provides:

Table 1 Core Platform Features

Feature	Impact
24/7 Patient Monitoring	Continuous analysis of journal entries, check-ins, voice notes
Real-Time Risk Detection	99.2% accuracy in identifying T2/T1/T0 alerts
Automated Documentation	AI-generated summaries save 5.2 hours/week per clinician
Clinician-Supervised AI	Every insight requires clinician approval (CSP-002)

The Result: 4-hour response time becomes 4 minutes (60x faster)

1.4 Market Opportunity

Table 2 Market Sizing

Market Segment	Size	Growth
TAM (US Mental Health Software)	$17B	18% CAGR
SAM (AI-Assisted Mental Health)	$2B	25% CAGR
SOM (3-Year Target)	$100M	--

Target Customers: 180,000 mental health clinicians across 6,000 US hospitals

1.5 Business Model

SaaS Subscription:

- $150/clinician/month
- $50/patient/month (enterprise)
- $5K implementation fee

Unit Economics:

- Customer LTV: $18,000
- Customer CAC: $4,500
- **LTV:CAC Ratio: 4:1**

Revenue Example: 100-clinician health system = $230K Year 1

1.6 Revenue Streams

Peacefull.ai employs a multi-channel revenue strategy to maximize market penetration and accelerate growth:

Direct Sales

Target: Health systems, hospital networks

Pricing: $150/clinician/month

Implementation: $5K-$25K

Sales Cycle: 3-6 months

Channel Partners

Target: EHR vendors, health IT consultants

Revenue Share: 20-30% of ACV

Examples: Epic, Cerner partners

Benefit: Reduced CAC, faster scale

Resellers

Target: Regional healthcare IT resellers

Margin: 25-35% reseller discount

Focus: Mid-market health systems

Benefit: Geographic expansion

Medical Reps

Target: Independent physician practices

Commission: 15-20% first-year ACV

Focus: Psychiatry, psychology groups

Benefit: Access to decision makers

Table 3 Revenue Stream Projections (Year 2)

Channel	% of Revenue	Target ARR	Key Advantage
Direct Sales	50%	$540K	Highest ACV, full control
Channel Partners	25%	$270K	Reduced CAC, brand credibility
Resellers	15%	$162K	Geographic reach, local expertise
Medical Reps	10%	$108K	Practice relationships, faster closes

1.7 Traction

Table 4 Current Traction Metrics

Metric	Value
Health System Pilots	3 active
Active Clinicians	45
Patients Monitored	1,200
Current ARR	$85K
Daily Active Users	89%
Net Promoter Score	72
Pilot-to-Contract Rate	67%

> *"This platform has transformed how we monitor patients between sessions. We've caught 3 potential crises in the first month."*
>
> -- Dr. Michael Torres, Chief of Psychiatry, Metro Health

1.8 The Ask

Raising $10M Seed Round

Use of Funds:

- 50% Engineering (AI/ML, platform expansion)
- 30% Sales & Marketing (including channel partner development)
- 20% Operations & Compliance

Runway: 24 months to Series A

Target Milestones:

- Launch with 50 health systems
- Epic EHR integration
- FDA 510(k) clearance
- $2M ARR

2. Competitive Analysis

> **Executive Summary**
>
> The mental health technology market is crowded with consumer apps, but **no competitor offers clinician-supervised AI with integrated safety protocols**. Our differentiation is clear: we augment clinicians rather than replace them, creating a defensible moat built on trust, compliance, and measurable outcomes.

2.1 Competitive Landscape

Our Position: Top-right quadrant -- High AI sophistication + High clinician integration

Table 5 Competitive Positioning Matrix

Competitor	AI Sophistication	Clinician Integration	Primary Model
Woebot	Low	None	Consumer Chatbot
Wysa	Low	None	Consumer Chatbot
Ginger	Low	Medium	Coaching + Therapy
Lyra	Low	Medium	EAP Platform
Peacefull.ai	**High**	**High**	**Clinical AI Platform**

2.2 Direct Competitors

Woebot Health

Founded: 2017 | **Funding:** $123M | **Valuation:** ~$500M

Strengths	Weaknesses
Strong consumer brand	No clinician integration
Evidence-based CBT	Limited safety protocols
Good user engagement	Cannot detect crises
FDA Breakthrough Device	No EHR connectivity

Key Differentiator: Woebot is a consumer app. We are a clinical tool.

Wysa

Founded: 2015 | **Funding:** $20M+ | **Valuation:** ~$100M

Strengths	Weaknesses
AI-powered conversations	No clinician oversight
Strong in India/APAC	Limited US market presence
Good NLP capabilities	No safety escalation
Affordable pricing	No integration with care teams

Key Differentiator: Wysa is a wellness app. We are a medical device.

Ginger (now Headspace Health)

Founded: 2011 | **Funding:** $500M+ | **Valuation:** ~$3B (merged)

Strengths	Weaknesses
Large network of coaches	Coaches, not clinicians
Strong enterprise sales	No AI-assisted documentation
Good brand recognition	Limited between-session monitoring
Comprehensive EAP	High cost per employee

Key Differentiator: Ginger provides human coaching. We augment clinical care with AI.

Lyra Health

Founded: 2015 | **Funding:** $925M | **Valuation:** $5.8B

Strengths	Weaknesses
Strong provider network	No AI risk detection
Good care navigation	No real-time monitoring
Comprehensive EAP	High cost ($5-10 PEPM)
Proven outcomes	No clinician time savings

Key Differentiator: Lyra is a benefits platform. We are a clinical intelligence platform.

2.3 Competitive Advantages

1. Safety-First Design (The Moat)

What: T2/T1/T0 alert system with clinician oversight
Why it matters: In mental health, safety is non-negotiable
Defensibility: Requires clinical expertise + AI + regulatory compliance

2. Clinician Trust

What: Every AI insight requires clinician approval (CSP-002)
Why it matters: Clinicians won't adopt tools they don't trust
Defensibility: Built on relationships, not just technology

3. Explainable AI

What: Every decision is auditable and explainable
Why it matters: Healthcare requires transparency
Defensibility: Complex to build, easy to verify

4. EHR Integration

What: Native integration with Epic, Cerner
Why it matters: Workflow integration is critical for adoption
Defensibility: Partnerships and certifications take time

5. Regulatory Compliance

What: HIPAA, SOC 2, FDA 510(k) pathway
Why it matters: Healthcare buyers require compliance
Defensibility: Months/years to achieve certifications

2.4 Barriers to Entry

For New Competitors

1. **Clinical credibility** -- Need licensed clinicians on team
2. **Regulatory approvals** -- FDA, HIPAA, state licensure
3. **EHR partnerships** -- Epic/Cerner integration takes 12+ months
4. **Safety protocols** -- Building T2/T1/T0 system requires expertise
5. **Trust building** -- Takes years to earn clinician confidence

Table 6 Feature Comparison Matrix

Feature	Us	Woebot	Wysa	Ginger	Lyra
Clinician-Supervised AI	Yes	No	No	No	No
Real-Time Risk Detection	Yes	No	No	No	No
T2/T1/T0 Alert System	Yes	No	No	No	No
Automated Documentation	Yes	No	No	No	No
EHR Integration	Yes	No	No	No	No
Explainable AI	Yes	No	No	No	No
Between-Session Monitoring	Yes	No	No	No	No
HIPAA Compliant	Yes	Yes	Yes	Yes	Yes
FDA Pathway	Yes	Yes	No	No	No

Score: We win 8/9 categories

3. Product Roadmap

18-Month Planning Horizon

This roadmap balances ambition with execution. We're building the foundation in Q2 2026, scaling through integrations in Q3-Q4 2026, and expanding to become the platform of choice for AI-augmented mental health care by Q4 2027.

1	2	3	4	5
Foundation	**Growth**	**Scale**	**Expand**	**Platform**
Q2 2026	Q3 2026	Q4 2026	Q1-Q2 2027	Q3-Q4 2027

3.1 Phase 1: Foundation (Q2 2026)

Theme: Launch with core features and establish product-market fit

Goals

- Launch with 3 pilot health systems
- Achieve 89% daily active user rate
- Validate safety protocols in production
- Reach $85K ARR

Patient App Features

Feature	Status	Priority
Daily Check-ins	Complete	P0
Journal Entries	Complete	P0
Voice Notes	Complete	P0
Mood Tracking	Complete	P0
Crisis Button	In Progress	P1
Medication Reminders	Planned	P2

Clinician Portal Features

Feature	Status	Priority
Patient Dashboard	Complete	P0
T2/T1/T0 Alerts	Complete	P0
AI Summaries	Complete	P0
Caseload Management	Complete	P0
Inbox/Notifications	Complete	P0
Progress Reports	In Progress	P1

Success Metrics

- 150 clinicians onboarded
- 1,200 patients monitored
- 99.2% T2 alert detection rate
- <5% false positive rate
- 67% pilot-to-contract conversion

3.2 Phase 2: Growth (Q3 2026)

Theme: EHR integration and expand customer base

Goals

- Launch Epic integration
- Launch Cerner integration
- Expand to 20 health systems
- Reach $1.1M ARR

EHR Integration

Feature	Epic	Cerner	Other
Single Sign-On (SSO)	**Yes**	**Yes**	Planned
Patient Data Sync	**Yes**	In Progress	Planned
Clinical Notes Export	**Yes**	In Progress	Planned
Appointment Integration	In Progress	Planned	Planned
Billing Integration	Planned	Planned	Planned

Success Metrics

- 600 clinicians onboarded
- 20 health systems
- 50% of customers using EHR integration
- 4.0 LTV:CAC ratio

3.3 Phase 3: Scale (Q4 2026)

Theme: FDA clearance and enterprise readiness

Goals

- Submit FDA 510(k) application
- Launch enterprise features
- Reach 60 health systems
- Achieve $3.6M ARR

FDA 510(k) Submission

Component	Status	Timeline
Clinical Validation Study	In Progress	Q3 2026
Software Documentation	Planned	Q3 2026
Risk Management File	Planned	Q3 2026
510(k) Submission	Planned	Q4 2026
FDA Clearance	Target	Q2 2027

Success Metrics

- 2,000 clinicians
- 60 health systems
- FDA 510(k) submitted
- 82% gross margin

3.4 Phase 4: Expand (Q1-Q2 2027)

Theme: Geographic expansion and new verticals

Goals

- Launch in 2 additional states

- Expand to private practice market
- Reach 150 health systems
- Achieve $9M ARR

Geographic Expansion

State	Status	Notes
California	**Live**	Initial market
New York	In Progress	Q3 2026
Texas	Planned	Q1 2027
Florida	Planned	Q2 2027

Success Metrics

- 5,000 clinicians
- 150 health systems
- 20% private practice customers
- 85% gross margin

3.5 Phase 5: Platform (Q3-Q4 2027)

Theme: API ecosystem and partner integrations

Goals

- Launch public API
- Build partner ecosystem
- Reach 350 health systems
- Achieve $21.6M ARR

Public API Endpoints

Endpoint	Description	Status
Patient Data API	Read patient information	Planned
Alerts API	Subscribe to alerts	Planned
Insights API	Access AI-generated insights	Planned
Webhooks	Real-time notifications	Planned

Partner Integrations

Partner	Integration	Timeline
Teladoc	Telehealth workflow	Q3 2027
Amwell	Virtual care platform	Q3 2027
MDLive	Online therapy	Q4 2027
Calm	Wellness app data	Q4 2027

Success Metrics by Phase

Table 7 Phase Success Metrics

Phase	Clinicians	Health Systems	ARR	Key Milestone
Foundation (Q2 2026)	150	5	$270K	Product-market fit
Growth (Q3 2026)	600	20	$1.1M	EHR integration
Scale (Q4 2026)	2,000	60	$3.6M	FDA submission
Expand (Q1-Q2 2027)	5,000	150	$9M	Geographic expansion
Platform (Q3-Q4 2027)	12,000	350	$21.6M	API ecosystem

4. Go-to-Market Strategy

> **24-Month Execution Plan**
>
> Our go-to-market strategy is designed to achieve **$2M ARR within 12 months** and **$10M ARR within 24 months** through a multi-channel approach: Direct Sales, Channel Partners, Resellers, Medical Representatives, and Self-Serve expansion.

4.1 Target Customer Profile

Primary: Health Systems

Size: 50-500 mental health clinicians
Annual Revenue: $500M+
Geography: California, New York, Texas (initial)

Decision Makers:

1. Chief of Psychiatry / Behavioral Health
2. Chief Medical Officer
3. Chief Information Officer
4. VP of Population Health

Pain Points:

- Clinician burnout and turnover
- Missed patient crises between sessions
- Documentation overhead
- Limited visibility into patient wellbeing
- Pressure to improve outcomes

Secondary: Private Practices

Size: 5-20 clinicians
Focus: Outpatient mental health
Geography: Nationwide

4.2 Multi-Channel GTM Strategy

Phase 1: Direct Sales (Q2-Q3 2026)

Goal: 25 health systems, $1M ARR

Sales Team Structure

Role	Count	Timing	Compensation
VP Sales	1	Q2 2026	$200K base + 1% equity
Enterprise AE	2	Q2 2026	$120K base + $120K OTE
SDR	2	Q3 2026	$60K base + $30K OTE
Sales Engineer	1	Q3 2026	$130K base + $50K OTE

Sales Process

Timeline	Activity
Week 1-2	Discovery Call -- Qualification
Week 3-4	Demo + ROI Discussion
Week 5-8	Pilot Agreement (3-month pilot)
Week 9-12	Pilot Execution
Week 13-16	Contract Negotiation
Week 17+	Contract Signed -- Implementation

Pricing

Tier	Clinicians	Price/Clinician/Month	Implementation
Starter	10-50	$150	$5,000
Growth	51-200	$140	$10,000
Enterprise	201+	$125	$25,000

4.3 Channel Partners & Resellers

Channel Partner Strategy (Q3 2026 - Q4 2027)

Goal: 30% of revenue through channel partners by Q4 2027

Table 8 Channel Partner Types

Partner Type	Target	Revenue Share	Focus
EHR Vendors	Epic, Cerner, Meditech	20-25% ACV	Native integration, co-selling
Health IT Consultants	Regional firms	20-25% ACV	Implementation, workflow optimization
Healthcare Resellers	10+ regional partners	25-35% discount	Geographic expansion, local support
Medical Reps	50+ independent reps	15-20% commission	Private practices, physician groups

Partner Enablement

- **Sales Training:** 2-day certification program
- **Marketing Collateral:** Co-branded materials, case studies
- **Demo Environment:** Partner-specific demo instances
- **Deal Registration:** Protected territories, lead sharing
- **Partner Portal:** Resources, training, support tickets

Channel Sales Team

Role	Count	Timing
VP Partnerships	1	Q3 2026
Partner Manager	2	Q4 2026
Partner SE	1	Q4 2026

Expected Results by Channel

Table 9 Channel Revenue Projections

Channel	Q4 2026	Q2 2027	Q4 2027
Direct Sales	70%	60%	50%
EHR Partners	15%	20%	25%
Resellers	10%	12%	15%
Medical Reps	5%	8%	10%

4.4 Marketing Strategy

Brand Positioning

Tagline: "AI-Augmented Mental Health Care"
Positioning: The only clinician-supervised AI platform for mental health

Personality: Professional, trustworthy, innovative, compassionate

Content Calendar

Quarter	Content Type	Topic
Q2 2026	Whitepaper	"The Cost of Clinician Burnout"
Q3 2026	Webinar	"AI in Mental Health: Opportunities and Risks"
Q4 2026	Case Study	"How Metro Health Reduced Documentation Time by 5.2 Hours"
Q1 2027	Research Report	"State of Mental Health Technology 2027"

4.5 Key Performance Indicators (KPIs)

Leading Indicators

KPI	Target	Measurement
MQLs per month	50	Marketing qualified leads
SQLs per month	20	Sales qualified leads
Demo requests	15	Per month
Pilot starts	5	Per month

Lagging Indicators

KPI	Target	Measurement
New customers	4	Per month
ARR	$2M	Q2 2027
ACV	$18,000	Average
CAC	$4,500	Target
LTV:CAC	4:1	Target

Budget Allocation

Year 1 Marketing Budget: $600,000

Category	Amount	%
Digital Advertising	$180,000	30%
Events & Conferences	$120,000	20%
Content Marketing	$90,000	15%
PR & Communications	$60,000	10%
Partner Enablement	$90,000	15%
Brand & Creative	$60,000	10%

5. Financial Model Summary

Path to Profitability

Our financial model demonstrates a clear path to $21.6M ARR by Q4 2027 with healthy unit economics, strong gross margins (75% to 87%), and profitability by Q2 2027.

5.1 Revenue Projections

Table 10 Five-Year Revenue Projections

Period	Clinicians	Health Systems	ARR
Q2 2026 (Year 1)	150	5	$270K
Q2 2027 (Year 2)	600	20	$1.1M
Q2 2028 (Year 3)	2,000	60	$3.6M
Q2 2029 (Year 4)	5,000	150	$9M
Q2 2030 (Year 5)	12,000	350	$21.6M

Revenue Model Details

Metric	Q2 2026	Q2 2027	Q2 2028	Q2 2029	Q2 2030
Clinicians	150	600	2,000	5,000	12,000
Health Systems	5	20	60	150	350
Avg Clinicians/System	30	30	33	33	34
Revenue/Clinician/Month	$150	$150	$150	$150	$150
Avg Patients/Clinician	25	30	35	40	45
Implementation Fees	$25K	$100K	$300K	$750K	$1.75M
Total ARR	**$270K**	**$1.1M**	**$3.6M**	**$9M**	**$21.6M**

5.2 Unit Economics

Table 11 Unit Economics Summary

Metric	Value	Notes
Customer Acquisition Cost (CAC)	$4,500	Sales + Marketing / New Customers
Average Contract Value (ACV)	$18,000	100 clinicians x $150/month x 12 months
Average Contract Length	12 months	Annual contracts with auto-renewal
Gross Margin	80%	Excluding implementation costs
Lifetime Value (LTV)	$18,000	ACV x Gross Margin x Avg Contract Length
LTV:CAC Ratio	**4:1**	Healthy SaaS ratio
Months to Recover CAC	3 months	CAC / (ACV x Gross Margin / 12)

P&L Summary

Table 12 Profit & Loss Summary

Line Item	Q2 2026	Q2 2027	Q2 2028	Q2 2029	Q2 2030

Investment Opportunity Summary

Peacefull.ai is raising a $10M Seed round to scale our clinician-supervised AI platform for mental health. With 3 active pilots, 45 clinicians using the platform daily, and a 67% pilot-to-contract conversion rate, we're positioned to capture a significant share of the $2B AI-assisted mental health market.

Key Highlights:

- 99.2% T2 alert detection rate
- 5.2 hours saved per clinician weekly
- 4:1 LTV:CAC ratio
- Path to $21.6M ARR by Q2 2030

We invite you to experience our interactive demo and discuss how you can participate in transforming mental health care delivery.
