1. Executive Summary

Investment Opportunity at a Glance

Behavioral Health AI Companion is a clinician-supervised AI platform that provides 24/7 mental health monitoring, automated documentation, and real-time crisis detection. We bridge the critical gap between therapy sessions, helping clinicians detect concerning patterns 60x faster while saving 5.2 hours per week on documentation.

Founded: 2025 | **Stage:** Seed | **Raising:** $10M

1.1 The Company

Behavioral Health AI Companion is transforming mental health care delivery through AI-augmented, clinician-supervised patient monitoring. Our platform provides continuous insight into patient wellbeing between therapy sessions, enabling early intervention and improved outcomes.

Unlike consumer mental health apps that operate without clinical oversight, our platform is designed from the ground up for healthcare environments, with HIPAA compliance, safety protocols, and seamless EHR integration.

1.2 The Problem

Mental health care is in crisis:

68%
of mental health crises occur between therapy sessions

30%
of concerning patterns go unnoticed by clinicians

4+ hrs
average response time to patient crises

$50B
annual cost of untreated mental health conditions in the US

Clinicians are burned out, patients fall through the cracks, and health systems struggle to provide continuous care. The status quo is unsustainable.

1.3 The Solution

Our AI-powered platform provides:

Table 1 Core Platform Features

Feature	Impact

24/7 Patient Monitoring	Continuous analysis of journal entries, check-ins, voice notes
Real-Time Risk Detection	99.2% accuracy in identifying T2/T1/T0 alerts
Automated Documentation	AI-generated summaries save 5.2 hours/week per clinician
Clinician-Supervised AI	Every insight requires clinician approval (CSP-002)

The Result: 4-hour response time becomes 4 minutes (60x faster)

1.4 Market Opportunity

Table 2 Market Sizing

Market Segment	Size	Growth
TAM (US Mental Health Software)	$17B	18% CAGR
SAM (AI-Assisted Mental Health)	$2B	25% CAGR
SOM (3-Year Target)	$100M	--

Target Customers: 180,000 mental health clinicians across 6,000 US hospitals

1.5 Business Model

SaaS Subscription:

- $150/clinician/month
- $50/patient/month (enterprise)
- $5K implementation fee

Unit Economics:

- Customer LTV: $18,000
- Customer CAC: $4,500
- **LTV:CAC Ratio: 4:1**

Revenue Example: 100-clinician health system = $230K Year 1

1.6 Traction

Table 3 Current Traction Metrics

Metric	Value

Health System Pilots	3 active
Active Clinicians	45
Patients Monitored	1,200
Current ARR	$85K
Daily Active Users	89%
Net Promoter Score	72
Pilot-to-Contract Rate	67%

> *"This platform has transformed how we monitor patients between sessions. We've caught 3 potential crises in the first month."*
>
> -- Dr. Michael Torres, Chief of Psychiatry, Metro Health

1.7 The Ask

> **Raising $10M Seed Round**
>
> **Use of Funds:**
>
> - 50% Engineering (AI/ML, platform expansion)
> - 30% Sales & Marketing
> - 20% Operations & Compliance
>
> **Runway:** 24 months to Series A
>
> **Target Milestones:**
>
> - Launch with 50 health systems
> - Epic EHR integration
> - FDA 510(k) clearance
> - $2M ARR

2. Competitive Analysis

> **Executive Summary**
>
> The mental health technology market is crowded with consumer apps, but **no competitor offers clinician-supervised AI with integrated safety protocols**. Our differentiation is clear: we augment clinicians rather than replace them, creating a defensible moat built on trust, compliance, and measurable outcomes.

2.1 Competitive Landscape

Our Position: Top-right quadrant -- High AI sophistication + High clinician integration

Table 4 Competitive Positioning Matrix

Competitor	AI Sophistication	Clinician Integration	Primary Model
Woebot	Low	None	Consumer Chatbot
Wysa	Low	None	Consumer Chatbot
Ginger	Low	Medium	Coaching + Therapy
Lyra	Low	Medium	EAP Platform
Behavioral Health AI	**High**	**High**	**Clinical AI Platform**

2.2 Direct Competitors

Woebot Health

Founded: 2017 | **Funding:** $123M | **Valuation:** ~$500M

Strengths	Weaknesses
Strong consumer brand	No clinician integration
Evidence-based CBT	Limited safety protocols
Good user engagement	Cannot detect crises
FDA Breakthrough Device	No EHR connectivity

Key Differentiator: Woebot is a consumer app. We are a clinical tool.

Wysa

Founded: 2015 | **Funding:** $20M+ | **Valuation:** ~$100M

Strengths	Weaknesses
AI-powered conversations	No clinician oversight
Strong in India/APAC	Limited US market presence
Good NLP capabilities	No safety escalation
Affordable pricing	No integration with care teams

Key Differentiator: Wysa is a wellness app. We are a medical device.

Ginger (now Headspace Health)

Founded: 2011 | **Funding:** $500M+ | **Valuation:** ~$3B (merged)

Strengths	Weaknesses
Large network of coaches	Coaches, not clinicians
Strong enterprise sales	No AI-assisted documentation
Good brand recognition	Limited between-session monitoring
Comprehensive EAP	High cost per employee

Key Differentiator: Ginger provides human coaching. We augment clinical care with AI.

Lyra Health

Founded: 2015 | **Funding:** $925M | **Valuation:** $5.8B

Strengths	Weaknesses
Strong provider network	No AI risk detection
Good care navigation	No real-time monitoring
Comprehensive EAP	High cost ($5-10 PEPM)
Proven outcomes	No clinician time savings

Key Differentiator: Lyra is a benefits platform. We are a clinical intelligence platform.

2.3 Competitive Advantages

1. Safety-First Design (The Moat)

What: T2/T1/T0 alert system with clinician oversight
Why it matters: In mental health, safety is non-negotiable
Defensibility: Requires clinical expertise + AI + regulatory compliance

2. Clinician Trust

What: Every AI insight requires clinician approval (CSP-002)
Why it matters: Clinicians won't adopt tools they don't trust
Defensibility: Built on relationships, not just technology

3. Explainable AI

What: Every decision is auditable and explainable
Why it matters: Healthcare requires transparency
Defensibility: Complex to build, easy to verify

4. EHR Integration

What: Native integration with Epic, Cerner
Why it matters: Workflow integration is critical for adoption
Defensibility: Partnerships and certifications take time

5. Regulatory Compliance

What: HIPAA, SOC 2, FDA 510(k) pathway
Why it matters: Healthcare buyers require compliance
Defensibility: Months/years to achieve certifications

2.4 Barriers to Entry

For New Competitors

1. **Clinical credibility** -- Need licensed clinicians on team
2. **Regulatory approvals** -- FDA, HIPAA, state licensure
3. **EHR partnerships** -- Epic/Cerner integration takes 12+ months
4. **Safety protocols** -- Building T2/T1/T0 system requires expertise
5. **Trust building** -- Takes years to earn clinician confidence

For Existing Competitors

1. **Pivoting to clinical use** -- Requires complete product redesign

2. **Adding safety features** -- Retrofitting is harder than building-in
3. **Clinician relationships** -- We already have pilot customers
4. **Regulatory pathway** -- They'd need to start from scratch

Table 5 Feature Comparison Matrix

Feature	Us	Woebot	Wysa	Ginger	Lyra	Talkspace
Clinician-Supervised AI	Yes	No	No	No	No	No
Real-Time Risk Detection	Yes	No	No	No	No	No
T2/T1/T0 Alert System	Yes	No	No	No	No	No
Automated Documentation	Yes	No	No	No	No	No
EHR Integration	Yes	No	No	No	No	No
Explainable AI	Yes	No	No	No	No	No
Between-Session Monitoring	Yes	No	No	No	No	No
HIPAA Compliant	Yes	Yes	Yes	Yes	Yes	Yes
FDA Pathway	Yes	Yes	No	No	No	No
Time Savings for Clinicians	Yes	No	No	No	No	No

Score: We win 9/10 categories

3. Product Roadmap

18-Month Planning Horizon

This roadmap balances ambition with execution. We're building the foundation in Q1, scaling through integrations in Q2-Q3, and expanding to become the platform of choice for AI-augmented mental health care by 2027.

1	2	3	4	5
Foundation	**Growth**	**Scale**	**Expand**	**Platform**
Q1 2026	Q2 2026	Q3 2026	Q4 2026	Q1-Q2 2027

3.1 Phase 1: Foundation (Q1 2026)

Theme: Launch with core features and establish product-market fit

Goals

- Launch with 3 pilot health systems
- Achieve 89% daily active user rate
- Validate safety protocols in production
- Reach $85K ARR

Patient App Features

Feature	Status	Priority
Daily Check-ins	Complete	P0
Journal Entries	Complete	P0
Voice Notes	Complete	P0
Mood Tracking	Complete	P0
Crisis Button	In Progress	P1
Medication Reminders	Planned	P2

Clinician Portal Features

Feature	Status	Priority
Patient Dashboard	Complete	P0
T2/T1/T0 Alerts	Complete	P0
AI Summaries	Complete	P0
Caseload Management	Complete	P0
Inbox/Notifications	Complete	P0
Progress Reports	In Progress	P1

Success Metrics

- 150 clinicians onboarded
- 1,200 patients monitored
- 99.2% T2 alert detection rate
- <5% false positive rate
- 67% pilot-to-contract conversion

3.2 Phase 2: Growth (Q2 2026)

Theme: EHR integration and expand customer base

Goals

- Launch Epic integration
- Launch Cerner integration
- Expand to 20 health systems
- Reach $1.1M ARR

EHR Integration

Feature	Epic	Cerner	Other
Single Sign-On (SSO)	**Yes**	**Yes**	Planned
Patient Data Sync	**Yes**	In Progress	Planned
Clinical Notes Export	**Yes**	In Progress	Planned

Appointment Integration	In Progress	Planned	Planned
Billing Integration	Planned	Planned	Planned

Success Metrics

- 600 clinicians onboarded
- 20 health systems
- 50% of customers using EHR integration
- 4.0 LTV:CAC ratio

3.3 Phase 3: Scale (Q3 2026)

Theme: FDA clearance and enterprise readiness

Goals

- Submit FDA 510(k) application
- Launch enterprise features
- Reach 60 health systems
- Achieve $3.6M ARR

FDA 510(k) Submission

Component	Status	Timeline
Clinical Validation Study	In Progress	Q2 2026
Software Documentation	Planned	Q2 2026
Risk Management File	Planned	Q2 2026
510(k) Submission	Planned	Q3 2026
FDA Clearance	Target	Q1 2027

Success Metrics

- 2,000 clinicians
- 60 health systems
- FDA 510(k) submitted
- 82% gross margin

3.4 Phase 4: Expand (Q4 2026)

Theme: Geographic expansion and new verticals

Goals

- Launch in 2 additional states
- Expand to private practice market
- Reach 150 health systems
- Achieve $9M ARR

Geographic Expansion

State	Status	Notes
California	**Live**	Initial market
New York	In Progress	Q2 2026
Texas	Planned	Q4 2026
Florida	Planned	Q4 2026

Success Metrics

- 5,000 clinicians
- 150 health systems
- 20% private practice customers
- 85% gross margin

3.5 Phase 5: Platform (Q1-Q2 2027)

Theme: API ecosystem and partner integrations

Goals

- Launch public API
- Build partner ecosystem
- Reach 350 health systems
- Achieve $21.6M ARR

Public API Endpoints

Endpoint	Description	Status
Patient Data API	Read patient information	Planned
Alerts API	Subscribe to alerts	Planned
Insights API	Access AI-generated insights	Planned
Webhooks	Real-time notifications	Planned

Partner Integrations

Partner	Integration	Timeline
Teladoc	Telehealth workflow	Q1 2027
Amwell	Virtual care platform	Q1 2027
MDLive	Online therapy	Q2 2027
Calm	Wellness app data	Q2 2027
Fitbit	Wearable data	Q2 2027

Success Metrics by Phase

Table 6 Phase Success Metrics

Phase	Clinicians	Health Systems	ARR	Key Milestone
Foundation	150	5	$270K	Product-market fit
Growth	600	20	$1.1M	EHR integration
Scale	2,000	60	$3.6M	FDA submission
Expand	5,000	150	$9M	Geographic expansion
Platform	12,000	350	$21.6M	API ecosystem

4. Go-to-Market Strategy

> **24-Month Execution Plan**
>
> Our go-to-market strategy is designed to achieve **$2M ARR within 12 months** and **$10M ARR within 24 months** through a three-phase approach: Direct Sales, EHR Partnerships, and Self-Serve expansion.

4.1 Target Customer Profile

Primary: Health Systems

Size: 50-500 mental health clinicians
Annual Revenue: $500M+
Geography: California, New York, Texas (initial)

Decision Makers:

1. Chief of Psychiatry / Behavioral Health
2. Chief Medical Officer
3. Chief Information Officer
4. VP of Population Health

Pain Points:

- Clinician burnout and turnover
- Missed patient crises between sessions
- Documentation overhead
- Limited visibility into patient wellbeing
- Pressure to improve outcomes

Secondary: Private Practices

Size: 5-20 clinicians
Focus: Outpatient mental health
Geography: Nationwide

Decision Makers:

1. Practice Owner / Medical Director
2. Office Manager

4.2 Three-Phase GTM Strategy

Phase 1: Direct Sales (Months 1-12)

Goal: 50 health systems, $2M ARR

Sales Team Structure

Role	Count	Timing	Compensation
VP Sales	1	Month 1	$200K base + 1% equity
Enterprise AE	2	Month 2	$120K base + $120K OTE
SDR	2	Month 3	$60K base + $30K OTE
Sales Engineer	1	Month 4	$130K base + $50K OTE

Sales Process

Timeline	Activity
Week 1-2	Discovery Call -- Qualification
Week 3-4	Demo + ROI Discussion
Week 5-8	Pilot Agreement (3-month pilot)
Week 9-12	Pilot Execution
Week 13-16	Contract Negotiation
Week 17+	Contract Signed -- Implementation

Pricing

Tier	Clinicians	Price/Clinician/Month	Implementation
Starter	10-50	$150	$5,000
Growth	51-200	$140	$10,000
Enterprise	201+	$125	$25,000

Phase 2: EHR Partnerships (Months 12-24)

Goal: 150 health systems, $10M ARR

Partnership Strategy

Primary Partners:

1. **Epic App Orchard** -- Application submitted: Month 9, Approval: Month 12, Co-marketing: Month 15
2. **Cerner Code Program** -- Partnership agreement: Month 10, Integration complete: Month 14, Joint sales: Month 16
3. **Meditech Alliance** -- Partnership agreement: Month 14, Integration complete: Month 18

Partner Benefits

- **Revenue Share:** 20% of first-year ACV
- **Co-Marketing:** Joint webinars, case studies
- **Sales Support:** Dedicated sales engineer
- **Product Integration:** Native EHR workflow

Phase 3: Self-Serve (Months 24+)

Goal: 350 health systems, $50M ARR

Product-Led Growth Strategy

Freemium Model:

- **Free:** Up to 3 clinicians, basic features
- **Pro:** $50/clinician/month, full features
- **Enterprise:** Custom pricing, advanced features

4.3 Marketing Strategy

Brand Positioning

Tagline: "AI-Augmented Mental Health Care"
Positioning: The only clinician-supervised AI platform for mental health
Personality: Professional, trustworthy, innovative, compassionate

Content Calendar

Month	Content Type	Topic
1	Whitepaper	"The Cost of Clinician Burnout"
2	Webinar	"AI in Mental Health: Opportunities and Risks"
3	Case Study	"How Metro Health Reduced Documentation Time by 5.2 Hours"
4	Blog Series	"5 Ways AI Can Support Your Clinical Practice"

5	Research Report	"State of Mental Health Technology 2026"
6	Conference	APA Annual Meeting (booth + speaking)

PR Strategy

Target Publications: Healthcare IT News, Modern Healthcare, Becker's Hospital Review, STAT News, MobiHealthNews

Story Angles:

- "AI Reduces Mental Health Crisis Response Time by 60x"
- "How One Health System Saved $1.4M with AI"
- "The Future of Clinician-Supervised AI in Healthcare"

4.4 Customer Success

Onboarding Process

Week	Activity
Week 1	Technical setup, EHR integration
Week 2	Clinician training (2-hour session)
Week 3	Patient onboarding support
Week 4	First check-in, feedback collection
Ongoing	Monthly business reviews

Success Metrics

Metric	Target	Measurement
Time to Value	<2 weeks	First alert generated
Feature Adoption	>80%	Daily active users
NPS Score	>50	Quarterly survey
Support Tickets	<5/month	Per customer
Expansion Revenue	20%	Annual upsell

4.5 Key Performance Indicators (KPIs)

Leading Indicators

KPI	Target	Measurement
MQLs per month	50	Marketing qualified leads
SQLs per month	20	Sales qualified leads
Demo requests	15	Per month
Pilot starts	5	Per month

Lagging Indicators

KPI	Target	Measurement
New customers	4	Per month
ARR	$2M	Month 12
ACV	$18,000	Average
CAC	$4,500	Target
LTV:CAC	4:1	Target

Budget Allocation

Year 1 Marketing Budget: $600,000

Category	Amount	%
Digital Advertising	$180,000	30%
Events & Conferences	$120,000	20%
Content Marketing	$90,000	15%
PR & Communications	$60,000	10%
Sales Enablement	$90,000	15%
Brand & Creative	$60,000	10%

5. Financial Model Summary

Path to Profitability

Our financial model demonstrates a clear path to $21.6M ARR by Year 5 with healthy unit economics, strong gross margins (75% to 87%), and profitability by Month 36.

5.1 Revenue Projections

Table 7 Five-Year Revenue Projections

Year	Clinicians	Health Systems	ARR
1	150	5	$270,000
2	600	20	$1,080,000
3	2,000	60	$3,600,000
4	5,000	150	$9,000,000
5	12,000	350	$21,600,000

Revenue Model Details

Metric	Year 1	Year 2	Year 3	Year 4	Year 5
Clinicians	150	600	2,000	5,000	12,000
Health Systems	5	20	60	150	350
Avg Clinicians/System	30	30	33	33	34
Revenue/Clinician/Month	$150	$150	$150	$150	$150
Avg Patients/Clinician	25	30	35	40	45
Implementation Fees	$25,000	$100,000	$300,000	$750,000	$1,750,000
Total ARR	**$270,000**	**$1,080,000**	**$3,600,000**	**$9,000,000**	**$21,600,000**

5.2 Unit Economics

Table 8 Unit Economics Summary

Metric	Value	Notes
Customer Acquisition Cost (CAC)	$4,500	Sales + Marketing / New Customers
Average Contract Value (ACV)	$18,000	100 clinicians x $150/month x 12 months
Average Contract Length	12 months	Annual contracts with auto-renewal
Gross Margin	80%	Excluding implementation costs
Lifetime Value (LTV)	$18,000	ACV x Gross Margin x Avg Contract Length
LTV:CAC Ratio	**4:1**	Healthy SaaS ratio
Months to Recover CAC	3 months	CAC / (ACV x Gross Margin / 12)

P&L Summary

Table 9 Profit & Loss Summary

Line Item	Year 1	Year 2	Year 3	Year 4	Year 5
Revenue (ARR)	$270,000	$1,080,000	$3,600,000	$9,000,000	$21,600,000
Cost of Revenue	$67,500	$237,600	$648,000	$1,350,000	$2,808,000
Gross Profit	$202,500	$842,400	$2,952,000	$7,650,000	$18,792,000
Gross Margin %	75%	78%	82%	85%	87%

Total Operating Expenses	**$138,000**	**$207,000**	**$287,500**	**80%**
Monthly Burn Rate	$138,000	$207,000	$287,500	--
Annual Burn	$1,656,000	$2,484,000	$3,450,000	--

5.4 Use of Funds

Table 12 $10M Seed Round Allocation

Category	Allocation	Percentage	Purpose
Engineering & Product (50%)			
AI/ML Research	$1,500,000	15%	Improve AI accuracy, expand NLP capabilities
Platform Development	$2,500,000	25%	Build new features, scale infrastructure
Security & Compliance	$500,000	5%	HIPAA audits, SOC 2, FDA clearance

Sales & Marketing (30%)			
Sales Team	$1,800,000	18%	Hire 3 senior sales reps
Marketing	$600,000	6%	Content, events, digital marketing
Partnerships	$600,000	6%	EHR integration partnerships
Operations (20%)			
Customer Success	$800,000	8%	Customer success team, onboarding
Legal & Regulatory	$400,000	4%	FDA 510(k), legal counsel
General & Administrative	$1,300,000	13%	Finance, HR, admin
Total Use of Funds	**$10,000,000**	**100%**	--

Key Assumptions

Table 13 Financial Model Key Assumptions

Assumption	Value	Source/Justification
Pricing - Clinician/Month	$150	Market rate for clinician tools
Pricing - Patient/Month	$50	Enterprise pricing for patient monitoring
Implementation Fee	$5,000	One-time setup and training
Avg Clinicians per Health System	30	Based on mid-size health systems
Avg Patients per Clinician	30	Industry average caseload
Customer Acquisition Cost (CAC)	$4,500	Healthcare SaaS benchmark
Gross Margin	80%	SaaS standard (excl. implementation)
Annual Churn Rate	10%	Conservative estimate for healthcare
Sales Cycle (Pilot to Contract)	3 months	Healthcare sales cycle
Pilot Conversion Rate	67%	Current pilot performance

6. Investment Package Roadmap

> **Complete Fundraising Playbook**
>
> This section provides a comprehensive framework for executing a successful VC fundraising process, from initial outreach to closing the round.

6.1 Complete Package Framework

Tier 1: Critical Materials (First Meeting)

Material	Purpose	Status
Interactive Demo	Show, don't tell	**Complete**
Pitch Deck (12 slides)	Tell the story	**Complete**
Executive Summary (1-pager)	Get the meeting	**Complete**
Financial Model	Show the opportunity	**Complete**
Demo Video (2-3 min)	Shareable asset	Planned

Tier 2: Due Diligence Materials

Material	Purpose	Status
Technical Architecture Doc	Prove it works	**Complete**
Competitive Analysis	Show differentiation	**Complete**
Product Roadmap (18-month)	Show vision	**Complete**
Go-to-Market Strategy	Show execution plan	**Complete**
Team Bios/Advisors	Prove you can build it	**Complete**

6.2 The Perfect Pitch Sequence

Phase 1: Get the Meeting (Email/LinkedIn Outreach)

Materials: Executive Summary + Demo Link

Outreach Email Template

Subject: $2B Mental Health AI Opportunity - 10 Min Demo

Hi [VC Name],

We're building the AI platform that helps clinicians detect mental health crises 60x faster. Our interactive demo shows how we save 5.2 hours/week per clinician while improving patient outcomes.

Key metrics:

- 99.2% T2 alert detection rate
- $1.6M annual savings per 100 clinicians
- 340% ROI for health systems
- HIPAA/SOC 2 compliant

Interactive demo: https://hdyyjvra5bpqm.ok.kimi.link
Executive summary: [ATTACH]

Can we schedule 20 minutes next week?

[Your Name]
[Title]

Phase 2: First Meeting (30-45 minutes)

Materials: Pitch Deck + Live Demo

Table 14 Recommended Meeting Flow (30 Minutes)

Time	Section	Materials
0:00-2:00	Hook	"68% of crises happen between sessions"
2:00-5:00	Problem	Problem slide + data
5:00-10:00	Solution	Story Mode demo
10:00-13:00	Market	Market size slide
13:00-16:00	Business Model	Pricing + unit economics
16:00-19:00	Traction	Metrics + customer quote
19:00-22:00	Competition	Competitive matrix
22:00-25:00	Team	Team slide

25:00-28:00	Financials	Projections slide
28:00-30:00	The Ask	Funding request

Phase 3: Due Diligence (After Expression of Interest)

Materials: Full data room with all Tier 1 & 2 materials

Phase 4: Partner Meeting (Final Pitch)

Materials: Refined deck + live product demo + Q&A prep

6.3 Key Metrics VCs Want to See

Product Metrics

- Monthly Active Users (clinicians)
- Monthly Active Patients
- Session Duration
- Feature Adoption Rates
- Net Promoter Score (NPS)

Business Metrics

Metric	Target
Monthly Recurring Revenue (MRR)	Growing 10%+ monthly
Annual Contract Value (ACV)	$18,000
Customer Acquisition Cost (CAC)	$4,500
Lifetime Value (LTV)	$18,000
LTV:CAC Ratio	>3:1
Churn Rate	<5% annually
Gross Margin	>80%

Safety Metrics (Our Moat)

- T2 Alert Detection Rate: 99.2%
- False Positive Rate: <10%
- Average Response Time: 4 min

- Clinician Time Saved: 5.2 hrs/week
- Patient Outcomes Improvement: Measured

6.4 Critical Questions to Prepare

Product/Technology

Q: How is this different from Woebot/Ginger?
A: They're consumer apps. We're clinician-supervised with safety protocols.

Q: What if the AI makes a mistake?
A: Every AI insight is a "draft" requiring clinician approval. CSP-002.

Q: How do you handle data privacy?
A: HIPAA, SOC 2, end-to-end encryption. Show compliance badges.

Business

Q: What's your go-to-market strategy?
A: Start with health systems, expand through EHR partnerships.

Q: How do you acquire customers?
A: Direct sales + channel partners. CAC is $4.5K, LTV is $18K.

Q: What's the path to $100M ARR?
A: X clinicians x $Y/month x 12 months = $Z. Here's the math...

Market

Q: How big is this market really?
A: $17B US mental health software, growing 18% annually.

Q: Who are your competitors?
A: Show competitive matrix. We're the only ones with clinician-supervised AI.

6.5 Investor Target List

Tier 1: Healthcare-Focused VCs (Highest Probability)

- Andreessen Horowitz (Bio fund)
- GV (Google Ventures)
- Khosla Ventures
- Venrock
- Bessemer Venture Partners
- 8VC
- Rock Health

- Lux Capital

Tier 2: AI/ML-Focused VCs

- Sequoia Capital
- Greylock Partners
- Index Ventures
- Accel
- Battery Ventures

Tier 3: Generalist VCs (Series A+)

- Benchmark
- First Round Capital
- Lightspeed Venture Partners
- Founders Fund

6.6 Timeline to Funding

Table 15 12-Week Fundraising Timeline

Week	Activity	Deliverables
1-2	Material Preparation	Finalize deck, model, summary, data room
3-4	Outreach Phase	Research VCs, get warm intros, send emails
5-8	Meeting Phase	20-30 first meetings, refine pitch
9-12	Due Diligence & Close	Full DD, partner meetings, close round

Success Metrics for the Raise

Metric	Target
First Meetings	30
Conversion to Second Meeting	40% (12 meetings)
Conversion to Term Sheet	25% (3 term sheets)
Close Rate	33% (1 closed round)
